

地理信息系统  
Geographic Information Systems

## GIS地理资讯系统

作为智能气网的门户，GIS提供可视化管理平台，一目了然地下燃气管网资产、输配气调度等信息

### 产品特点

- 可视化 (基于电子地图展现管网资源)
- 动态化 (便捷的管网信息维护, 资料及时更新)
- 智能化 (提供科学、准确的数据作决策分析)
- 数字化 (传统图纸表格数字化)
- 行业化 (爆管分析、水力分析、用气量分析)

### GIS (Geographic Information System)

GIS works as a portal of smart gas application providing visualized asset information of underground gas pipes network, gas transmission and distribution

#### Product features

- Visualization (Pipe network resources displayed as a layer of digital map)
- Dynamic (User friendly pipe network data maintenance, update-to-date information)
- Intelligence (Provide scientific and accurate data for decision making)
- Digital (Digitize hard copy of engineering graph and form)
- Industrial (Gas leakage, hydraulic and consumption analysis)
