

GIS地理信息系统

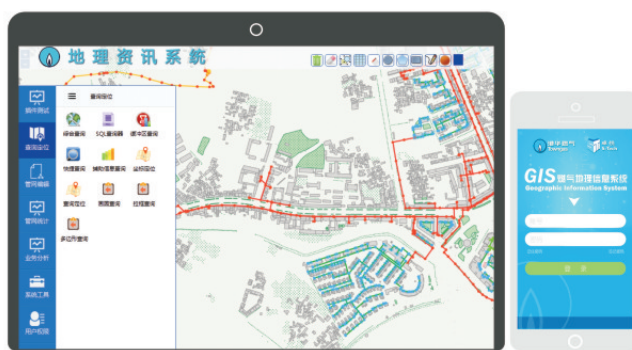

GIS (Geographic Information System)

作为智能气网的门户，GIS提供可视化管理平台，一目了然地下燃气管网资产、输配气调度等信息。

GIS works as a portal of smart gas application providing visualized asset information of underground gas pipes network and gas transmission and distribution.

产品特点 Product features

- **可视化** (基于电子地图层展现管网资源)
Visualization (Pipe network resources displayed as a layer of digital map)
- **动态化** (便捷的管网信息维护，资料及时更新)
Dynamical (User friendly pipe network data maintenance, update to date information)
- **智能化** (提供科学、准确的数据作决策分析)
Intelligence (Provide scientific and accurate data for decision making)
- **数字化** (传统图纸表格数字化)
Digitalization (Digitalise hard copy of engineering graph and form)
